planning as an engaged approach, drawing on and portraying theoretical and educational equity perspectives. It calls for the right to language policy-making in which all concerned—communities, parents, students, educators, and advocates—collectively imagine new strategies for resisting global neoliberal marginalization of home languages and cultural identities. This book subsequently emphasizes the means by which engaged dialectic processes can inform and clarify language policy-making decisions that promote equity. In other words, rather than descriptions of outcomes,

the authors emphasize the need to detail the means by which local/regional actors resist and transform inequitable policies. These descriptions of processes thereby provide all actors with ideological, pedagogical, and equity policy tools that can inform situated school and community policy-making. This book depicts ways in which engaged language policy embodies the intersection of critical inquiry, participant involvement, and ongoing engaged language planning processes. It further offers an alternative to the traditional top-down approach to language education policy-making. Engaged Language Policy and

Practices is essential reading for scholars, teachers, students, communities, and others concerned with worldwide language and identity equity.

**Challenging the Monolingual**

**Mindset** John Hajek 2014-10-01

This volume challenges the monolingual mindset by highlighting how language-related issues surround us in many different ways, and explores the tensions that can develop in managing and understanding multilingualism. The book features analysis and discussion on the use of languages across a range of contexts, including post-migration settlement, policy, education, language contact and intercultural communication. **Karnali Blues** Buddhisagar 2022-05 Karnali Blues, by Buddhisagar, is the most widely read Nepali novel to have appeared in the last twenty years. As it recounts the

evolution of a father-son relationship—a son's search for approval, a father's small acts of kindness and forgiveness, a son's fears for his father's dignity as his fortunes and faculties begin to fail—the reader is deeply drawn into young Brisha Bahadur's world. His father is kind and idealistic; his mother, though she is kind too, is often frustrated and irascible. The characters in this book are some of the most carefully drawn and authentic in all of Nepali literature. In a backwater district of a country about to undergo radical social, political and cultural change, Brisha's dreams, his games and his mischief, his loves, his hopes

and his fears come alive. Translated from the Nepali by Michael Hutt, this highly original piece of work, with the simplicity of its language and its emotional range, holds the power to take your breath away. Its principal themes—the love between a son and his father, the joys and sorrows of childhood, the daily struggle for survival—are universal, and will resonate with readers the world over.

*The Book of L* G. Rozenberg  
2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and

theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems.

Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with

L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could

not contribute, we in particular regret the absence of A.

Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

**Being and Hearing** Peter Graif  
2018-06-15 How do deaf people in different societies perceive and conceive the world around them? Drawing on three years of anthropological fieldwork in Nepali deaf communities, *Being and Hearing* shows how questions of cultural difference are profoundly shaped by local habits of perception. Beginning with the premise that philosophy and cultural intuition are separated only by genre and pedigree, Peter Graif argues

that Nepali deaf communities--in their social sensibilities, political projects, and aesthetics of expression--present innovative answers to the very old question of what it means to be different. From pranks and protests, to diverse acts of love and resistance, to renewed distinctions between material and immaterial, deaf communities in Nepal have crafted ways to foreground the habits of perception that shape both their own experiences and how they are experienced by the hearing people around them. By exploring these often overlooked strategies, *Being and Hearing* makes a unique contribution to ethnography and

comparative philosophy.

**Teachers as Course Developers**

Kathleen Graves 1996-02-23

This is a book about how language teachers themselves rather than curriculum specialists develop and implement their own courses.

The paperback edition illuminates the process of course development through the narratives of six ELT teachers who have designed courses in

widely varying contexts worldwide. Graves provides a framework for course design and examines how these six teachers have utilized or departed from the framework in meeting the challenges of their particular situations. Each narrative is followed by an analysis and a set of tasks that direct the reader's attention to a particular aspect of the framework.

### **Language in Late Capitalism**

Alexandre Duchêne 2012 This book examines the ways in which our ideas about language and identity which used to be framed in national and political terms as a matter of rights and citizenship are increasingly

recast in economic terms as a matter of added value. It argues that this discursive shift is connected to specific characteristics of the globalized new economy in what can be thought of as "late capitalism". Through ten ethnographic case studies, it demonstrates the complex ways in which older nationalist ideologies which invest language with value as a source of pride get bound up with newer neoliberal ideologies which invest language with value as a source of profit. The complex interaction between these modes of mobilizing linguistic resources challenges some of our ideas about globalization, hinting that we are

in a period of intensification of modernity, in which the limits of the nation-State are stretched, but not (yet) undone. At the same time, this book argues, this intensification also calls into question modernist ways of looking at language and identity, requiring a more serious engagement with capitalism and how it constitutes symbolic (including linguistic) as well as material markets.

**Love Across the Salt Desert**

Keki N. Daruwalla 2011 The iconic title story of this collection narrates how Najab defies his father, the international border

between India and Pakistan and the hostile salt desert of the Rann of Kutch for Fatimah. In 'When Gandhi Came to Gorakhpur' Shadilal, a small-time lawyer, dithers over giving up his profession and joining the freedom struggle until his mind is made up for him. And when Sultan Mahmud of Ghazni stints on a few silver coins for the poet Abul Qasim, he is visited by terrible nightmares in 'Of Abul Qasim'. Love across the Salt Desert, which brings together a selection of Keki Daruwalla's best-received short fiction, presents thematic variety and stunning breadth of vision. His prose is witty, precise and shot through with a unique

poetic sensibility. These stories establish Daruwalla, one of India's best-known poets, as a daring and gifted practitioner of short fiction. Son, have you brought anything? he asked, an edge of iron deliberately introduced into his voice. Yes, replied Najab, as he ushered Fatimah in. The rain stormed down and swept away three years of drought.

Industrial Entomology Omkar  
2017-02-13 This book is a compilation of writings focused on conventional and unconventional insect products. Some of these products are commercial successes, while others are waiting to be launched and are the potential produce of the future. In addition to the well known products honey, mulberry silk, and lac, the book primarily

concentrates on silk producing insects other than the mulberry silkworm, insects as food, as sources of medicines, pest and weed managers, and as pollinators. The book highlights the all pervasive role of insects in improving human lives at multiple levels. Accordingly, while most books on insects concentrate on how to limit growth in their population, it instead focuses on how to propagate them. In each chapter, the book brings to the fore how insects are far more beneficial to us than their well publicised harmful roles. This book approaches both unconventional and conventional insect products,

such as honey, silk and lac in much more depth than the available literature. It investigates different aspects of the production of these insects, such as the related processes, problems and utilities, in dedicated chapters. Because this book deals with the production of insects or their produce, it has been named Industrial Entomology, perhaps the only book that truly reveals the tremendous potential of insects to help humans live better lives. Based on the research and working experience of the contributors, who are global experts in their

respective fields, it provides authentic, authoritative and updated information on these topics. The book offers a unique guide for students, teachers, policy planners, small scale industrialists, and government ministries of agriculture and industry across the globe. It will provide a much required stimulus to insect appreciation and generate enthusiasm for research and the broader acceptance for insect produce. Hopefully, it will also present the Indian perspective on these topics to a global readership. The Ants and the Grasshopper Aesop 1995
